Akshat Singh

I am writing to express my interest in the Defi Quant Risk position at Karpatkey . I am a third-year Computer Science Engineering student with a strong knack for developing financial quantitative solutions. I've also been interested in the Blockchain ecosystem ever since my first year of college .

In my previous role as a Product Developer Intern at Speak Your Mind Education, I worked on the front-end of the company's MVP , the front-end of the said project was made using React, HTML, and CSS, and I also contributed to the back-end development made using Django. I have also developed a Real Estate NFT DApp that allows users to list and buy properties. A Spotify clone web-app/mobile compatible, and a weather web-app.

In addition to my experience in DeFi development, I also have a strong understanding of data structures and algorithms. I have taken several courses on these topics, and I have also participated in several hackathons where I have applied my knowledge to solve real-world problems.

I am confident that I have the skills and experience that you are looking for in a Defi Quant Risk. I am a hard worker, I am always eager to learn new things, and I am passionate about DeFi. I am confident that I can make a significant contribution to your team.
.

Sincerely,
Akshat Singh
